PROFILE

Currently sitting in high school grade 11, pursuing my dream career to study computer science abroad. Want to make the best use of my computer skills to bring good changes to the world and hope that all of my projects I'll be working on will help global problems. I believe myself is an initiative person and have good leadership skill because I often lead teams so our teams will do as best as we could.

EDUCATION

2007-2016
SoliDeo Christian School
I studied here from kindergarten until the last grade of elementary, which is grade 6. I was taught to be myself and have more fun in this school, and that's why there are many memories I can't forget during my time in this school.

2016-2021
IPEKA Plus BSD
I studied here from junior high until now, grade 11, I'll continue to study here until I finished grade 12, which will be around 2022. This school brought me to the realization, to focused more on my academics. I've become more competent since I got into this school.

EXPERIENCES

2019-2021
SH Student Council
Being part of the school's organization is a new thing for me, but I learned a lot from this organization, especially on improving my leadership and how to plan and manage activities/event with my team.

2017-2021
Sunday School Teacher Assistant
It's a very fun thing to be part of Sunday School teacher assistant, because not only I met and teach kids, but join them in many fun activities as well.

2019
Flag Raiser
One of the great experiences I've had throughout my high school time, where we train together to become a group of strong people.

2019 & 2020
Mechatronics Day
Competing with other national teams in building our own robots using the Arduino system. In the second year, my team won 5th place and the best presentation award.

2021
HACK THE NORTH 2020++
Competing with other international teams in Canada's biggest hackathon where we build our own program that offer a great solution to related-problems. This event has also taught me how to connect with international people, and throughout this event, I've made new friends and connections as well.
